DETAILED ACTION

It appears that applicant inadvertently did not cancel and/or withdraw claims 10 and 11. The claims depend from a claim(s) that has been canceled or withdrawn. For the purpose of this Office Action, claims 10 and 11 will not be treated on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9 and 12 are finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 9, it is not clear what is meant by the phrase "accepts dry dimensional.....horizontal".

Regarding claim 12, it is not clear what is not clear if one or more of the shoulder rivets in the teardrop shaped slots. Further, there is lack of antecedent basis for the limitation "teardrop shaped slots".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3725

Claims 9 and 12 are finally rejected under 35 U.S.C. 102(b) as being anticipated by Rosenband (US Patent 5,951,060).

The device of Rosenband reads on the claimed limitations including two or more loading bearing supports, each support formed by bolting one or more horizontal members (12) to one vertical forming one right angle assembly (fig. 1), shoulder rivets (46) and each support spaced a distance apart from each other (fig.1)

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 9 and 12 are finally rejected under 35 U.S.C. 102(e) as being anticipated by Brock et al (US Patent 6,948,691).

The device of Brock et al reads on the limitations of the claimed device including two or more loading bearing supports, each support formed by bolting one or more horizontal members (74) to one vertical forming one right angle assembly (fig. 10), shoulder rivets (20) and each support spaced a distance apart from each other (fig. 10).

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3725

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
